Engineering Solutions. Automating Success.

ABOUT US

REX AUTOMATION PVT LTD is an industrial automation and engineering solutions company delivering reliable, scalable, and cost-effective systems for manufacturing plants, process industries, infrastructure projects, and utility applications.

We provide end-to-end support from concept engineering and design through manufacturing, software development, installation, testing, commissioning, and after-sales service. Our solutions are developed to improve process visibility, operational efficiency, safety, reliability, and long-term maintainability.

Our scope includes industrial automation, electrical engineering, control-panel solutions, instrumentation integration, operations and maintenance, technical manpower, industrial supply, and technical training.

OUR APPROACH

- Understand the process.
- Engineer the right solution.
- Execute safely.
- Support reliably.

OUR CORE SERVICES

Industrial Automation

PLC, HMI, SCADA, VFD, SPM, IIoT, system integration, commissioning and retrofit solutions.

Electrical Engineering & Contracting

HT/LT installations, substations, cable laying, industrial wiring, earthing, power distribution and site execution.

Control Panels & Instrumentation

Automation panels, MCC/PCC panels, VFD panels, field instrumentation, sensors and control integration.

Operations & Maintenance

AMC, O&M contracts, preventive maintenance, troubleshooting, breakdown support and facility support.

Technical Manpower Solutions

Automation engineers, PLC programmers, electricians, technicians, panel wiring, fitters and maintenance personnel.

Industrial Supply & Training

PLCs, sensors, relays, cables, switchgear, tools, spares, safety items, technical training and skill development.

ENGINEERING SOLUTIONS.
AUTOMATING SUCCESS.

WHY CHOOSE REX AUTOMATION

- Practical Engineering Experience**
Strong understanding of automation design, site execution, testing, commissioning, and troubleshooting.
- End-to-End Solutions**
From engineering and panel fabrication to PLC/SCADA development, installation, commissioning, and maintenance.
- Customized Project Delivery**
Solutions designed around process requirements, operating conditions, safety standards, and client expectations.
- Quality, Safety & Documentation**
Focus on reliable workmanship, structured documentation, FAT/SAT support, and safe site practices.
- Responsive Support**
Flexible support for project execution, shutdown activities, plant upgrades, breakdowns, and AMC requirements.

INDUSTRIES WE SERVE

 Water & Wastewater Treatment	 Oil & Gas	 Chemical & Process Industries	 Food & Beverage	 HVAC & Refrigeration
 Cement & Steel	 Automotive & Manufacturing	 Utilities & Infrastructure	 Power & Energy	 General Industrial Applications

TECHNICAL CAPABILITIES

PLC, HMI, SCADA, VFD, industrial networking, OPC/OPC UA, data acquisition, instrumentation, control panels, energy monitoring, remote monitoring, retrofit, migration, FAT, SAT, commissioning, and maintenance support.

PLATFORMS / SYSTEMS EXPOSURE

Siemens S7-1200, S7-1500, S7-300, S7-400, WinCC Professional, WinCC Unified, Schneider M580, Honeywell ML200/ML200R/HC900, Rockwell Studio 5000, FactoryTalk View SE, and industrial communication systems.

Let's build smarter industries together.
